CAREER OBJECTIVE

B.E. IT student with a strong interest in Artificial Intelligence and Machine Learning, seeking an internship to learn, apply my skills, and gain practical experience in building real-world AI solutions.

EDUCATION

MVPS's KBT College of Engineering, Nashik
B.E. Information Technology

Expected 2027
CGPA: 9.19 / 10.0

KEY COURSES

Data Structures & Algorithms • Database Management Systems • Object Oriented Programming • Machine Learning • Web Technologies • Cloud Computing

SKILLS

Programming Languages: Python, C++, Java, SQL

AI / ML: Machine Learning, Natural Language Processing, Computer Vision, Image Processing, Face Recognition, OpenCV

Libraries & Frameworks: Scikit-learn, Pandas, NumPy, Matplotlib, TensorFlow, PyTorch

Web Development: React.js, Node.js, HTML, CSS, JavaScript, API

Databases: MySQL, MongoDB, Firebase

Tools & Platforms: Jupyter Notebook, Google Colab, Kaggle, GitHub, VS Code, Figma

Soft Skills: Analytical Thinking, Problem Solving, Leadership, Team Collaboration, Task Management

RESEARCH EXPERIENCE

Student Research Assistant | Ongoing

- Contributing to an AI/ML-based research project on mosquito detection and disease prevention under the guidance of faculty and industry professionals, involving data preprocessing, model development, experimentation, and performance evaluation.

KEY PROJECTS

AI Surveillance System | Python, OpenCV, Face Recognition

[GitHub](#)

- Developed a real-time AI surveillance system using computer vision for face recognition and motion-based intrusion detection
- Implemented automated alerts with snapshot/video capture and structured event logging

SmartRoute Travel- AI-Powered Travel Booking & Route Optimization Platform | React.js, Node.js, Express.js, Firebase Firestore, Tailwind CSS, Mistral AI API

[GitHub](#)

- Developed a full-stack travel booking platform with AI-based route optimization across multiple transport modes
- Integrated a chatbot for user support, and implemented automated email system for booking confirmations and tickets

Sentiment Analysis System | Python, NLP, Machine Learning

[GitHub](#)

- Built a text classification system to categorise input as positive, negative, or neutral using supervised learning
- Implemented text preprocessing, feature extraction, and model training methods, achieving 91% classification accuracy.

TECHGUIDE – AI Career Guidance Platform | HTML, CSS, JavaScript, Gemini API

[GitHub](#)

- Built an AI-powered career guidance platform with personalized roadmaps and learning recommendations using Gemini API
- Developed a responsive frontend with optimized user experience across devices

ResumeIQ- AI Resume Analyzer | Python, NLP

[GitHub](#)

- Built a resume parsing system with secure authentication, file upload and text extraction features
- Integrated database storage for user profiles and resume data

INTERNSHIP EXPERIENCE

Full Stack Development Intern | Completed

[GitHub](#)

School Magazine Management System | React.js, TypeScript, Firebase

- Developed a digital publishing platform enabling schools to create and manage static and dynamic magazines.
- Built a centralized magazine store for discovering and viewing publications from multiple schools.
- Integrated Firebase for authentication, database management, and content storage

TECHNICAL ACHIEVEMENTS

- Qualified GATE 2026 (CSE & IT)
- Winner - Innovate Maharashtra: The Gemini & Gen AI Hackathon 2026
- Finalist – VishwaNova MIT-WPU Innovation Expo 2026
- Participant – Google Developer Groups (GDG) Solutions Challenge (2025,2026), Smart India Hackathon (SIH) 2024 and multiple national-level hackathons
